RE: Freedom of Information (FOIA) Request for Non-Public Documents related to P-2150, Baker Hydroelectric Project in Washington State

Dear Ms Crenshaw-Davis, *Gladys -*

Please find attached my FOIA request for Non-public documents associated with P-2150, the Baker Hydroelectric Project in Washington State. Please note my previous request dated February 5th, 2007 requested both CEII documents as well as non-public documents. Since the processes to make these documents available are different, with this letter and the one that follows, I am separating the requests.

Under this FOIA request, I am requesting documents 2, 5, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 23, 24, 25, and 26 from the attached list. The City of Burlington is willing to pay a reasonable fee, not to exceed \$200.00, to obtain copies of these documents. Should the cost of producing these documents exceed that amount, the City would request a reduction in fees. To the extent possible, I would like to receive the requested documents in electronic format.

The City of Burlington is located downstream from the Baker Hydroelectric Project. As the City Engineer and technical representative to the Mayor and Council on flood issues, it is my responsibility to monitor the ongoing safety studies of the Baker facilities. These documents relate to that ongoing effort.

Thank you for your time and attention to this request.

Sincerely,

Chal A. Martin, P.E.
Director/City Engineer
