| 22 September 1976 the developer and his engineer vi ment and present high water data they obtained. D. | |

: meeting.

Request you compare data furnished by developer with our backwater analysis for idity. Also, investigate quality of cross-sections used in original analysis esfally how overbank portion of section was developed. Determine what additional , if any, is needed to develop the 100-year frequency floodway through the proed development. Furnish comments on your findings in sufficient detail to answer .E. (See inclosed copy of 25 August 1975 letter from D.O.E.)

Inclosed are the following items furnished by the developer:

a. Three signed affidavits

- b. Flood elevations at Pressentin Farm
- c. Topography map of proposed subdivision

w/o Incls skyn, then Br do - 3.9 Form 53 1) (rev)
