Mount Vernon, Washington 98273

Dear Mr. Stoker:

Thank you for your comments on our Skagit Levee and Channel Improvement Project public brochure.

As discussed on 12 May 1978 in a telephone conversation with your roommate, most of the information you requested is not yet available. We have completed most of our field surveys and foundation exploration and are currently developing the hydrologic model to determine the exact extent of the 100- and 10-year flood plain. As stated in the public brochure, the alternative cost estimates were not based on detailed studies, but were preliminary engineering estimates of the range of costs that could be involved for each of the alternatives.

In regards to your request for information on 1975 flood damages, I have inclosed the introduction and the chapter on the Skagit River Basin from our report, dated June 1977, on the floods of December 1975 and January 1976 in Western Washington. This includes information on the floods, methods of flood damage analysis, and a breakdown on the flood damages by types.

I hope this information fulfills your needs. If you wish to discuss this information or wish to see the information we are developing as part of our studies, please contact me at the above address or by telephone at (206) 764-3621. If it would be more convenient for you, I could call you at a prearranged time when you would be at the Co-op.

Sincerely yours,

1 Incl

REPRESENTING: Me

I want to continue receiving information on this study.

I do not wish to receive further information on this study.
Please remove my name from the mailing list.

April 17, 1978

Dear sirs,

I wish to prepare comments and proposals on the Skagit levee projects. Could you please supply me with the ~~below~~ below listed materials.

- map showing 100 and 10 year flood plain
Topo map base if you can a similar quality
- map showing river and Delta water depths
- for the 1975 flood
 - method of damage estimates
 - flood damage listed by types
 - ie. - farm
 - homes
 - highway structures
 - geographic distribution of Damage if possible
 - any other Floods that you have reliable Damage estimates.
 - locations where levee materials will come from
 - Itimize Alternative 3 management Costs

Thank you

Bruce Stoker
