JOHN WISEMAN

CITY ENGINEER, MT VERNON 336-6204

SUBJECT

SUBJECT: Skagit River Flood Control

SUMMARY

John advised that the Mt. Vernon Public Works Committee decided at their July 28 meeting to go ahead with a request to the Corps of Engineers to reactivate the Skagit flood control project. The Public Works Committee has 5 of 7 of the city council members on it and John believes that the city council as a whole will accept the recommendation of the Public Works Committee. He requested a draft of the sponsorship letter so that it could be presented at either the 10 August or 14 September council meeting.

I advised that we would prepare a draft letter for the city council and provide this to him the week of 1 August. In addition, I recapped the budgetary process for reactivating the project (budget request for FY 1991 for a recon study). In addition, we will make an effort to be more responsive to the city by checking into the possibility of preparing a "decision document" in FY 1989. I suggested the city begin discussion with Congressman Swift relative to a possible Congressional add in FY 1990.
