RE: Review of hydraulic modeling

Dear Mr. Semrau:

The hydraulic model provided with the Final Environmental Impact Statement limits the investigated area to the north side of the Skagit River in the vicinity of the proposed dike improvements. **As the proposed change in the dike configuration may result in hydraulic impacts on the south side of the River as well as the north, please provide hydraulic modeling for the south side of the Skagit River including the Nookachamps basin.** If you have any questions regarding this matter, please contact my office at (360) 336-9410.

Sincerely,

John Cooper, LG.
Planner/Geologist
